Welcome to your virtual booth in Remo
Remo is a web-based program that offers live, virtual events and networking space.

Easy face to face engagements just in like at a F2F conference

No downloads or installation required

During ICIS 2020 we will use Remo as the networking hub & Exhibit Hall for the conference
Floorplans

- There are numerous floorplans within the Remo platform
- Number of exhibitors and size of events will determine the final floorplan
- These are 3 sample floorplans that we have used and work well
Floorplans

Each floorplan will include:
• Logo branding at your booth/table or nearby
• A url link or video of your choice
• Reserved ‘table’ of 6
Virtual Booth/Table features:

- Logo Branding
- Ability to link logo to a video or weblink
- Customized call-to-action button
- Post event guest list
- Branding and Booth/Table is located on every floor
- Audio/Video with table guests
- Share Screen and White Board capabilities
- Custom announcements can be made on your behalf

Currently the seating capacity in the booth is 6, including the exhibitor/sponsor.
Here’s how it works!

- The Remo Platform will be used for all networking activities during the conference and called the ICIS Café
- In the Conference App, there is a dedicated page for the ICIS Café
- Schedule for events and a link to the ICIS Café will be posted on this page
- Opening and Closing times of the ICIS Café will be issued through the conference app
....how it works....

- When entering the Café, the system places the attendee at the first open seat.
- The attendee can then move from table to table, floor to floor by double clicking on a given table or use the chat to find a friend/colleague.

- Clicking on a logo brings up this box.
- Clicking on the call to action button will either take them to a website or start a video, your choice.
- Everyone who clicks on the call-to-action button is added to the ‘guest list’ which is exported after the conference and sent to you.
....how it works

• Everyone entering the Café for the first time is encouraged to complete their profile.
• Click on a person’s avatar and their virtual business card will be revealed.
• From this card you can access their Linkedin and Facebook pages, website and send them a message.

• All of the features and buttons for the guests at your table are located at the bottom of the screen.
• This does include chatting with guests at your table either as a group or privately.
• You can also use the Group Chat to send a message to anyone and everyone in Remo
Schedule of Events in the ICIS Café

• We are still working on the actual schedule and themes during break times. For current information on the conference schedule please click [here](#).
• We do anticipate 2 – 3 hours each day of scheduled and themed breaks in the Café.
• You are invited to each of these break times to participate at your table, network with attendees or join an event.
ICIS 2020 Registration opened just 2 weeks ago and already 300 AIS members have registered! The ICIS 2020 Committee has very exciting plans in-store including:

- Cutting-edge research presentations
- Keynote address by Narayana Murthy, Founder of Infosys
- Five panel sessions with a wide range of topics
- 25+ Ancillary workshops to choose from
- Unique social activities and networking on Remo

As an exhibitor and registered attendee you will have access to all events during ICIS 2020.

If you would like a live demo of the Remo Platform just let me know. Typically demo’s take about 30 minutes so I am sure we can find time in the next couple of weeks. Shoot me an email at lise@aisnet.org

WE HOPE YOU WILL JOIN US AT ICIS 2020!!!
